

**A JOB THAT TAKES
87.5 HOURS
BY HAND TAKES JUST
5 HOURS
WITH SPEEDYPULL**

SPEEDYPULL™

SPEEDYPULL is designed to automate commercial wire and cable pulling. The system accelerates the pulling of wire 6-gauge and lighter at a rate of up to 17.5 times faster than by hand. Operation requires the use of a standard 18 or 24 volt cordless drill.

Applications include but are not limited to pulling cable/wire through conduit and bar joists and from panel to panel, pulling bundled wire for parking lot lights, retracting broadcast cable, pulling alarm wire, telecommunication wire, even wire as large as 2-gauge with the use of a corded drill.

FEATURES

- Built for speed — with the power of a standard 18 or 24 volt cordless drill, SPEEDYPULL™ pulls 700 feet of cable/wire per minute compared to 40 feet of cable/wire per minute when pulled by hand
- Patented two-position pulling — upright position designed for pulling in lifts or from the ground and 45-degree position perfect for pulling from underground pipes and panels
- Easy-to-use — feed string through string guide, attach to SPEEDYREEL, secure drill in drive socket and press the power
- Maximum capacity — each SPEEDYREEL (sold separately) holds up to 4000 feet of wire, cable, or rope
- Durable and portable — powder-coated metal frame is virtually indestructible and folds down for easy lifting and transport
- Tremendous savings in cost and labor
- Allows for lower bidding — more contracts
- Rave testimonials from ALL of our customers
- Pays for itself in ONEWEEK
- Limited lifetime warranty
